**A good lift plan can light up  
a city or put it in the dark.**

# A good lift plan includes using certified operators.

Nationally accredited Crane Operator Certifications from CIC meet State and Federal requirements for testing operators by type of equipment at different levels of capacity.

Safety is increased when Operators and Riggers are tested according to skill level.

Certification contributes to better productivity for employers placing workers on the job, allocating training resources, and establishing pay scales.

**CIC certifications by capacity and type of crane are no more expensive than certifying by type alone.**

## Digger Derrick

- Operators must be certified according to OSHA if the equipment is used for construction work.
- Certification is mandatory in some industries.
- Developed by subject matter experts in electric utility and telecommunications.
- Tests cover two top hazards: Safe operation around power lines and communication with ground personnel.
- Certified Mobile Crane Operators can add Digger Derrick Certification with just 1 Written Exam.

## Articulating Boom Crane

- Operators must be certified according to OSHA if the equipment is used for construction work.
- Large contractors and government entities are demanding certification.
- Developed by experts familiar with applications in material delivery, roofing, and sign installation.
- Tests account for the functionality of a knuckleboom crane.
- Certified Mobile Crane Operators can add Articulating Boom Crane Certification with just 1 Written Exam.

## Service/Mechanics Truck

- Operators must be certified if the crane has a capacity greater than 1 ton and is being used for anything other than equipment maintenance and repair.
- Service/Mechanics Trucks with cranes are used in all industries, especially heavy construction.
- Developed by subject matter experts familiar with mobile cranes and the OSHA 1926.1400 regulation.
- Tests cover proper truck set-up when used as a crane and how to determine crane capacity.

**Additional Certifications: 5 Classes of Mobile Crane Operator | Rigger/Signalperson | Advanced Rigger | Lift Director**
